## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-80, 83, and 84, drawn to a configurable programmed holographic structure product, methods of using said product, and processes of making said product, classified in Class 359, subclass 22.
  - II. Claims 81 & 82, drawn to a method (read: process) of using comprising, *inter alia*, modifying the program characteristics of a configurable programmed holographic structure to maximize the output power, classified in Class 359, subclass 15.
  
2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the step of modifying the program characteristics of said configurable programmed holographic structure can also be practiced with, for the sake of example, such materially different products as micro-mirror arrays (MMAs) or digital mirror devices (DMDs).

• Art Unit: 2872

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
